It was released to Android and iOS stores on November 17, 2016. Controls[edit | edit source] Tap & hold left/right - Move in the respective direction Double tap & hold - Run in the respective direction Gameplay[edit | edit source] The player controls one of the six cats by touching and holding the left or right end of the screen. Double tap and hold causes the cat to run, so it jumps through gaps or walls. Cats can encounter in different levels on the map, each with their own abilities. Some of these capabilities are required to access secret parts of a level or acquire collections in which some backtracking and replay of the levels would be required. When a cat comes into contact with a danger or enemy, it becomes temporarily stunned and often kills the enemy in the process. This is the stunning phase, which is indicated by the rotating stars around the cat's head and lasts a few seconds. If the cat runs another danger or enemy while in the stunning phase, he dies, sending the player back to the map screen. If the cat gets out of the narcotic phase, he'll run into another enemy without dying again. Levels[edit | editing source] Super Cat Tales levels are divided into six different themed areas that appear in the order Cedar Woods, Sandy Shore, Nugget Canyon, Snowy Plains, Lava Ruins, and Temple Jungle. Enemies[edit | edit source] Enemies, hereinafter referred to as henteries in the game, cover a wide range of appearances and behaviors. Most are specific to only one type of area on the map. Enemies will die when the cat reaches them, but cause the player to arise from a five-second penalty. Some helpers are also able to kill enemies with one or two shots. Each enemy killed lives again when the player respawns within a level after wandering beyond his borders. Turnips - Either found sleeping on the ground or floating in the air. Fish - Found swimming in the water. The green version simply floats, while the red version pops out of the water to attack the player. Monkeys - Throw a tennis ball (baseball mobile) at the player for sight and will run if the player gets close to them. Moles - Pops in and out of the ground and accidentally runs in. Rocks - Found in the canyon, walks up hills, then jumps and roll them towards the player. Skeleton Miners - Immobile until it has passed, you can run back and forth to try to hit the player. The red checkered spot is sometimes hidden in certain levels, the player must use a certain cat to make the red checkered spot to unlock hidden levels. Pink spot - A spawn point for the player that allows them to change cats for certain jobs or spawn helpers. Water - Makes the player swim and restricts their movement to move forward and upwards. As a cat lover and Mario fan, I couldn't find the perfect game. There were a lot of rip-offs from Mario that were glitchy or basic. So when I met this game, I said, Oh, great. Another Mario copy cat. Wait to see a cat? Try. Now, I'm only in the second world and the story is pretty basic, but it's so fuuum! The first cat looks exactly like my kitten However, the bells are a bit hard, but that's ok! I like challenges, so I'm glad to see some difficulty in a game. And this game obviously takes inspiration from Mario. Not only are you taking the whole game and adding extra graphics and textures, or just messing with the whole thing with ugly, hideous jumbled up mess ripoff products. He adds his own tricks to a game he's never seen before. Nintendo please do not stop this game. We know U. So far, it's my favorite mobile game. ALL TIME. That's what I'm trying to do. Sequel.
